

Bio Jet® Ammonia Away

BIO JET Ammonia Away is a biological aid designed to reduce ammonia and nitrate levels in residential, commercial and municipal applications:

- Septic and residential wastewater systems
- Commercial and municipal wastewater systems
- Lagoons and ponds
- Drain lines, down pipes and sumps
- Composting toilets
- Holding tanks and pump stations
- Fish hatcheries

BIO JET products are manufactured in the United States.

Ammonia Away:

- Is non-hazardous and non-toxic
- Prevents odors and system failures
- Converts ammonia into nitrites, achieving stable nitrification
- Achieves maximum growth rates in high aerobic conditions
- Performs best when wastewater has slightly basic pH level
- Shelf Life: 1 year, store in a cool area

A natural organic  solution of non-toxic bacteria designed to enhance biological activity in wastewater treatment systems.

Available in 1 gallon jugs and cases containing 6 - 1 gallon jugs

Residential/Municipal/Industrial Suggested Dosage Rates: pH must be between 6.9-7.8 for nitrification to occur

Plant Capacity (Gallons per day)	Initial Dosage (Each day for 3 days)	Maintenance Dosage (Each day)
1,000 - 1,500	12 oz.	4 oz.
1,500 - 25,000	24 oz.	8 oz.
25,000 - 50,000	48 oz.	16 oz.
50,000 - 75,000	72 oz.	24 oz.
75,000 - 100,000	96 oz.	32 oz.

*Additional dosage guidelines can be found on the product label.

Note: BIO JET 7 application rates may vary based on system design, constituents present in effluent waters, loading rates and system retention time.
