

# TYPES OF TREATREADY ULTRA CONCENTRATED FEED DISPENSERS

## PRODUCT APPLICATION GUIDE

- **TreatREADY** Ultra Concentrated Feed Dispensers are available in several different sizes and configurations for dispensing liquid, ready to use Ultra-Concentrated Treatments. These molded tanks are designed with a molded pump mounting shelf to accommodate an Advantage feed pump or add our extender shelf to accommodate the pump of your manufacturer's choice.
- **TreatREADY-4G** Ultra Concentrated Feed Dispensers use a 4-Gallon Storage Capacity
- **TreatREADY-7G** Ultra Concentrated Double Simplicity Feed Dispensers provide a 7-Gallon Storage Capacity
- Ultra Concentrated and the Double Ultra Concentrated Feeders utilize a Stainless Steel valve connection which is fully compatible with Bellacide, THPS, Amine and FACT based products. These dispensers also contain a Stainless Steel pin along with large drain holes in the bowl for rapid gravity filling of the units.
- Bio Ultra Concentrate Feeders are utilized for BromMax, BromMax 7.1 or Justeq07 where the feeder acts as a spill containment tank.
- Bio Ultra Concentrate Feeders will require a pump shelf.

## Application & Control

All TreatREADY Ultra Concentrated and Bio Ultra Concentrate Feeders come complete with mounting bracket and installation hardware. Mounting brackets attach to walls or panels with four stainless steel anchors and feeders simply slide into the mounting brackets so you're up and running fast! With the Ultra Concentrate Feed System there are no water lines to run and no overflow or backflow to consider, making installation even easier and faster! Ultra Concentrate Products require no dilution, they are fed NEAT, right out of the box!
